- what is this paper about?
- what do the authors mean by SEMANTICS?
- what kind of communication systems have researchers tried to teach primates?

  what's the difference with the critical piece of research?
- what empirical methods do the two parts of the paper employ?
  - observation
  - playback

- what are the vervet monkeys' predators?

  why does it make sense to describe their parenting patterns?
- SKIP tables 2 & 3 - although you should be able to identify what the goal of them are.
- Spectograms - what are they showing?
- what does Table IV show? / suggest?

- how, roughly, did the playback experiments work?
- describe Table VII
  - what do we expect about how they should behave?
  - which conclusion do we want to draw? which one do we want to avoid?
